Work Experience

2017-Present

MI Analyst

Thrifty Car & Van Rental

Part of a 20 person IT department supporting, developing and reporting on a number of systems - both in-house and third party - ranging from accounting to vehicle rental to fleet management

- Integrated and warehoused data from 9 distinct systems
- Developed and maintained hundreds of user-oriented dynamic reports and data models
- First line support for reports and data integration, via a user ticketing system
- Provided data expertise in agile development of web-based applications
- Main tools: SSRS, SSIS, SSAS / PowerPivot | Main languages: T-SQL, DAX, VB, M, PostgreSQL
- Used collaboration software (JIRA, Confluence) to share tasks/knowledge among team and department
- Experience developing within a source control system (TortoiseSVN)
- Continually expanded suite of data marts and refactored existing reports accordingly
- Improved robustness of team's work using automation, code abstraction and single-source-of-truth
- Collaborated with stakeholders to turn requirements into feasible specifications for extracting true trends from complex datasets
- Encouraged regular pair-programming to share new methods and counter team inexperience

2016-2017

Fleet Analyst

Thrifty Car & Van Rental

3 person team providing bespoke analysis on the co-ordination and rental of 20,000 vehicles

- Work varied between data validation, answering standalone queries, creating/running routine reports and developing flexible Excel reporting tools
- Minimised turnaround of new requests by anticipating future needs wherever possible
- Instrumental in closer integration with the IT department to combine strengths and avoid duplication
- Took on project to improve data warehousing of key rental data from daily to hourly

2014-2015

Technical Data Analyst

2 Sisters Food Group

Member of central team overseeing all technical functions across 40 food manufacture sites

- Managed technical and environmental KPI databases using Microsoft Excel – performing regular cycles of data import, validation, and amendment if necessary
- Supported introduction of specialist complaints handling software around the business
- Introduced statistical analysis for validation of visible trends

2011-2014

Microbiology Technician

2 Sisters Food Group

UKAS accredited food testing lab (>50 workers) focused on high quality, throughput and traceability

- Regular daily responsibility for all routine activity in the lab
- Confidential communication with customers regarding sensitive results and special requests
- Representing colleagues in bi-monthly meetings with management

2009-2011	Lab Assistant	Centre for Ecology and Conservation
2008	Shelving Assistant	University of Plymouth Library
